## Objective

A dedicated student of Telkom Vocational High School with expertise in web software development using Node.js and React.js. Experienced in building full-stack website applications and performing data analysis, with a proven track record of leadership across various roles.

## Education

**Telkom Malang Vocational High School** (2022 - present)

Software Engineering

- **Fields of expertise :** Web development using Node.js and React.js
- **Featured Projects :** Swimming pool ticket booking website, hotel room booking website, and endpoint for café website.

## Project

**Wikusama Café Website** (2024)

- This project is building full-stack website application.
- Using framework Next.js as the frond-end and Node.js as runtime and backend and PostgreSQL database and Prisma as the ORM.
- This project is an application of CRUD (Create, Read, Update, and Delete), mastering data (for admin role), authentication (registration and login), transactions (for cashier role) and analytic report like finance, cashier and history transactions (for manager role).

**Climatology Analytical Dashboard** (2024)

- The project is the application of data analysis of air quality, temperature, rainfall, and wind speed in the form of a dashboard.
- The project was created to fulfill the certification of expertise in data visualization.
- Using Python programming language and Seaborn and Matplotlib libraries (as data visualization), and using Numpy and Pandas (as data exploration).

**Hotel Booking and Administartion Website** (2024)

- This project serves as a hotel booking for customers and also creates an analytical dashboard for admins to make it easier to track orders.
- In this project, the role of back-end web developer and quality assurance was fulfilled.
- The programming language that used is Javascript by using framework React.js as front-end and Node.js as runtime and backend and MySql database.

**Endpoint Café Website** (2024)

- This project is to create a RestAPI of a café website.
- This project is an application of CRUD (Create, Read, Update, and Delete), mastering data (for admin role), authentication (registration and login), and transactions.
- The programming language that used is Javascript by Node.js as runtime and backend and MySql database.

### **Swimming Pool Ticket Reservation Website (2023)**

- In this project, the role of back-end web developer and quality assurance was fulfilled.
- This project is an application of CRUD (Create, Read, Update, and Delete), mastering data (for admin role), authentication (registration and login), and transactions.
- The programming that used is PHP Native dan database MySQL.

## **Certificate**

---

- **Certiport** - IT Specialist Database (2024)
- **Dicoding** - Basic of Python Programming (2024 - 2027)
- **Dicoding** - Basic of Structured Query Language (SQL) (2024 - 2027)
- **Dicoding** - Basic of AWS Cloud (2024 - 2027)
- **Udemy** - Building Production-Ready Apps with Prisma Client for NodeJs (2024)
- **Dicoding** - Basic of Javascript Programming Language (2024 - 2027)

## **Skill**

---

**Hard Skill :** Programming Language Javascript, PHP and Python, SQL, data analytic, AWS Cloud, and Wordpress.

**Soft Skill :** Leadership, communication, teamwork, time management, risk management, and critical thinking.

**Language :** Bahasa Indonesia (Native), English (Bilingual-Intermediate), and Dutch (Bilingual-Basic).

## **Training and Workshop**

---

### **PT. Lanius Innovasi (2024)**

React StoryBook

- Learning the basics of atomic design.
- Learning the basics of React.Js dan framework (Next.Js).
- Create website elements in di StoryBook.

### **Pijar Camp (2024)**

Back-end Developer

- Learning the basics of creating Application Programming Interface (API).
- Learning about the login system, dan authentication.

### **Jagoan Hosting (2024)**

WordPress Developer

- Introduction to Product Knowledge from Jagoan Hosting.
- Learning the concept of UI/UX design from researching competitors to creating website designs that will be created with WordPress.
- Learning about deploying website and using CPanel.
- Learning the basics of using Wordpress.
